

Wesley Thompson

647-822-6138 • Toronto, ON • w.thompson763@gmail.com

Product Manager with 3+ years building regulated digital platforms and experimentation infrastructure. Combines product leadership with deep analytics and AI systems evaluation and observability expertise to lead cross-functional teams spanning engineering, data science, and business stakeholders, translating ambiguous problems into scalable capabilities that drive measurable impact.

EXPERIENCE

Data Scientist - Product Analytics

Jan 2026 - Current

EQ Bank | Toronto, ON

- Built a standardized campaign measurement platform anchored by a universal control group, enabling unbiased incremental lift analysis across campaigns and reducing manual reporting by ~120 hours per month.
- Designed the experimentation baseline and KPI framework to quantify true campaign impact versus organic behavior, accelerating decision cycles and improving marketing investment allocation.
- Partnered with data engineering to productionize a scalable measurement pipeline integrating CRM data, establishing a repeatable experimentation workflow.

Applied AI, Design & Delivery

Apr 2025 - Aug 2025

Vector Institute of Artificial Intelligence | Toronto, ON

- Led cross-functional delivery of an agentic AI evaluation initiative, coordinating ML engineers and researchers to develop benchmark datasets, define evaluation metrics, and operationalize testing workflows for multi-step LLM systems.
- Driving the design of a technical workshop on LLM interpretability, guiding practitioners through methods to analyze model reasoning, diagnose failure modes, and improve transparency in agent-based systems.

Product Manager - Koodo eCommerce

Apr 2025 - Aug 2025

TELUS | Toronto, ON

- Owned redesign of the warranty enrollment journey using funnel analysis and UX research; reduced steps by **50% (6 → 3 clicks)** while meeting regulatory and compliance requirements.
- Defined product requirements, eligibility logic, and success metrics for a BYOD Warranty program, expanding warranty coverage to Koodo's largest customer segment and enabling attach-rate growth across ~3 million BYOD subscribers.
- Led end-to-end product readiness for the iPhone 17 eSIM launch, coordinating dependencies across Product, Engineering, Operations, Legal, and Customer Support; aligned 10+ stakeholders on scope, timelines, and launch criteria to ensure a seamless activation experience.
- Partnered with UX, Engineering, and Analytics to instrument ecommerce flows, validate post-launch performance, and iterate based on adoption and funnel data.

Product Owner - Digital & Strategy

Jul 2022 - Apr 2025

Home Trust Company | Toronto, ON

- Owned end-to-end product roadmap and backlog for the digital banking account origination platform, setting product vision and prioritizing features based on operational and customer impact.
- Led automation initiatives that increased Straight-Through Processing from **62% to 80%**, materially improving customer acquisition and reducing manual review volume; validated API endpoints and payloads during feature testing to ensure reliable integrations across digital banking workflows.
- Spearheaded the digital banking paperless initiative, converting users to electronic document delivery; increased digital delivery from 9% to 58% and reduced printing and mailing costs by ~\$200K annually.

EDUCATION

University of Toronto, Rotman School of Management | Master of Management Analytics

Aug 2025 – May 2026

- **Vector Scholar in AI** - Vector Institute, **Dean's Scholar Award** - Rotman School of Management – Full tuition scholarship

Toronto Metropolitan University | BCom - Business Technology Management

- CGPA: 3.99/4.33; Dean's list with Distinction

TECHNICAL SKILLS

Skills: Product Roadmapping, Product Management, Neural Networks, Product Analytics, RAG, Gen AI/LLMs, Deep Learning, Figma, Design-Thinking, SQL, Python, Data Analysis, PySpark, User Research, Agile delivery
